

Counterfeit Electronic Components Avoidance Workshop

This Workshop provides excellent training and guidance for your personnel on due diligence practices to avoid counterfeit components. Plus new information has been added on detecting reclaimed components; manufacturing of new counterfeits and suggested "Due Diligence Practices".

CCAW Topics

The listed topics will be presented by experienced component engineers well versed in the detection of counterfeit components.

- 1. Introduction & overview of issues;*
- 2. Optical inspection equipment & useful photographs;*
- 3. Counterfeit examples compared to authentic components;*
- 4. New DoD requirements;*
- 5. X-ray practices and findings;*
- 6. XRF verification of leads materials;*
- 7. Decap: Mechanical & chemical;*
- 8. Die inspection;*
- 9. Electrical testing;*
- 10. New industry standards, AS5553A, AS6081*

Attendees are invited to discuss their counterfeit issues.

Attendees will receive a Certificate of Attendance

Comments Received from Past CCAW

- Excellent information on how to spot counterfeits.*
- Good criteria for supplier selection and product inspections.*
- Outstanding photos of counterfeit components and how to spot them.*
- More OEMs and independent distributors need to understand the presented.*
- The speakers, technical data, information and examples of counterfeits were outstanding.*
- OEM & CM buyers and purchasing groups need to attend this Workshop.*
- Highly informative on detecting counterfeit components.*
- Best of all counterfeit training I have attended.*
